

Cody Partington

PROFILE

My name is Cody, I am pursuing a career as a full stack web developer. My previous career was in operations and compliance in fast food. In 2022 I left my that world to Study at Coder Academy to become a full stack web developer.

EXPERIENCE

MCDONALD'S WARWICK & STANTHORPE - OPERATIONS SUPERVISOR 2010 - 2022

I worked in the McDonald's system for 11 years now. I started at 14 and worked my way through all roles within our store. These roles being crew trainer, shift manager, restaurant manager, to now supervisor for the two stores in our organisation. I report directly to the licensee and am responsible for all systems of both restaurants including operations, compliance and profit within the two restaurants.

In my time as supervisor I have improved our organisations PAC through improving efficiencies in labour, food cost, waste and other controllable items. I have onboarded and developed strong management teams in both of our stores, who keep tight control of our day to day operations.

Compliance is a big part of our business between government, local council, and McDonald's corporate standards. My team is proud of being completely transparent and always being compliant.
